

M-205-2012

August 15, 2012

To: All Luxaire Dealers.

**Subject: ENERGY STAR® Most Efficient Certification**

The Environmental Protection Agency has awarded the LP9C model the ENERGY STAR Most Efficient designation for 2012. This is a significant recognition due to the fact that not all manufacturers have systems capable of achieving this combination of efficiency and functionality, and it positions these Acclimate™ models in a select group of premium units.

The requirements include: **AFUE 97% or higher    Communications capable  
System controller and status Automated configuration**

Additionally, the Acclimate LP9C model also fulfills the recommendation of having a user interface that translates diagnostic and setup information into plain text, and that provides access to outdoor ambient temperature.

These Most Efficient Luxaire systems are now included on the ENERGY STAR website at: [http://www.energystar.gov/index.cfm?c=most\\_efficient.me\\_furnaces](http://www.energystar.gov/index.cfm?c=most_efficient.me_furnaces)

Information about the Most Efficient program, including guidelines for use and instructions for obtaining graphics, can be found at: [http://www.energystar.gov/index.cfm?c=partners.most\\_efficient\\_criteria](http://www.energystar.gov/index.cfm?c=partners.most_efficient_criteria)

Information about the use of the ENERGY STAR identity can be found at: [http://www.energystar.gov/index.cfm?c=logos.pt\\_guidelines](http://www.energystar.gov/index.cfm?c=logos.pt_guidelines)

The recognition of these Luxaire Acclimate systems as Most Efficient is valid through Dec 31, 2012.

As always, our goal is to provide our customers with the best products available in the industry. We are excited about the recognition of these LP9C models as part of such an elite program.

Best wishes and success for the future!
